

Our history

Founded in 2018 as the software subsidiary of Losch Luxembourg, Losch Digital Lab operates from Portugal and Luxembourg. We design and deliver innovative digital solutions across industries — from automotive to mobility and beyond — helping businesses stay ahead in an ever-evolving tech landscape. As a trusted software development partner, we bring the experience, agility, and technical excellence to turn complex ideas into real, impactful products.

Why choose us

- 1. Access top IT talent**
Expand your capabilities with skilled developers in cutting-edge technologies, driving innovation.
- 2. Maximize your budget**
Achieve high-quality results at competitive prices with our cost-effective nearshore solutions.
- 3. Collaborate in real-time**
Enjoy real-time collaboration thanks to aligned time zones and efficient communication.
- 4. Build solutions you can trust**
Secure solutions built to meet strict European regulations like GDPR, ensuring peace of mind.
- 5. Scale at the speed of your growth**
Rapidly adapt to growth with scalable IT solutions designed for your evolving needs.

Your partner in digital transformation

Full-service solutions to help you grow, optimize and thrive.

We'd love to hear from you!

Building software with passion

from Luxembourg and Portugal

We take care of your **software needs** so you can take care of **your business**

Software built for impact

We design and develop modern web and mobile applications with intuitive user experiences and solid architecture. Our dedicated team guides you from idea to launch to deliver scalable, high-performance solutions tailored to your needs.

Data insights

We help you gain meaningful insights through data engineering, warehousing and reporting. Make faster and more confident business decisions that leverage growth and innovation.

IT security

We manage and protect your IT infrastructure so you can focus on your business. Our 24/7 IT support team ensures smooth operations, while our security services protect your data and systems from threats.

Our services

We empower your business with expert IT solutions, tailored to your exact needs. Our comprehensive services focus on data-driven insights, innovative software development, and robust IT operations.

IT security/DevOps

We help you secure your systems and streamline operations by automating deployments and managing infrastructure.

Data engineering

We set up the data pipelines and tools that help you collect, process, and leverage your data effectively.

Quality assurance

We thoroughly test your software to detect issues early and ensure consistent, reliable performance.

Product design

We create intuitive, user-centered interfaces based on real needs and continuous feedback.

App development

We build mobile applications that are fast, stable, and tailored to your users.

Web development

We develop websites that are easy to use, work on all devices, and support your business goals.

Why you should externalize

Outsourcing software development allows you to accelerate innovation, reduce costs, and stay focused on what matters most — growing your business. While you lead the vision, we handle the technical complexities.

- ✓ Gain access to experienced experts
- ✓ Stay flexible with scalable development
- ✓ Invest the time saved into your business
- ✓ Rely on our proven processes, security standards and quality control
